<sup>2</sup> Ensure the Fund code corresponds to the policy type and sales charge option chosen. If the fund code doesn't match the fund name, the fund code will apply. A policy cannot invest in multiple series types at the same time.

Use the *Automatic instructions* (70-0016) to setup or make changes to an automatic switch or transfer the PAC (pre-authorized chequing), APR (automatic partial redemption), or SIR (scheduled income redemption).

**If no instructions are received to change the allocation of a PAC, APR or SIR, we will continue to use the existing fund allocation.**

Any reference to:

- PAC is interchangeable with PPA (pre-authorized payment)
- APR is interchangeable with an AWD (automatic withdrawal), SRP (systematic redemption plan) or SWP (systematic withdrawal plan)
- SIR is interchangeable with SIP (scheduled income payment)

### 4. Mature units switch disclosure

**If applicable, you understand and acknowledge the following:**

1. Where units are held under a Deferred Sales Charge (DSC) option, you may hold both matured units (meaning they are no longer subject to a redemption charge) and units still subject to a redemption charge.
2. If you redeem units from a DSC option prior to expiry of the redemption charge schedule, you will be subject to a redemption charge. Subject to any DSC exempt redemptions, as permitted by your contract.
3. Where applicable, the trailing sales commission paid by Canada Life for Front-end load units is generally greater than that paid for DSC units.
4. There will be no transaction or ongoing incremental costs associated with this switch. The management expenses ratio of the applicable Funds will not increase as a result of this switch.
5. If this is a taxable event, the implications have been disclosed to you.
